Policy

Corporate Social
Responsibility

Together, for Humankind and the Planet

A word from the Managing Director

The industrial world is committed to a process of sustainable development, on an international level. Our company wanted to adopt an effective CSR framework.

Considerable efforts have already been made to fulfil these requirements and it was necessary to take stock. This study has allowed us to measure existing compliances with and departures from ISO 26000 certification and the United Nations Global Compact for sustainable development.

The diagram overleaf reiterates MAGUIN SAS's key commitments to all the variables of a CSR Charter.

As a genuine guarantee of progress and sustainability, the framework is emerging as the key to shared growth, which is profitable for the company, its employees, partners, civil society and the environment within which we operate.

This document forms part of the logical continuation of MAGUIN SAS's CSR Charter, as well as the Code of Ethics & Conduct for the MORET INDUSTRIES GROUP, our company's sole shareholder.

#4

Spheres of Action

Concrete commitments to support CSR within MAGUIN

Social

Human beings at the heart of the strategy
